

TBR is an international company with headquarters based in France, and serves in 57 different countries. It has specialised in the design, manufacture and marketing of unique dental implant solutions for over 30 years.

Authentic products

We aim to help you meet patient expectations with our authentic products and technologies. We are also keen to help you communicate to patients in order to grow your practice.

As well as the popular bone level implants, TBR specialises in their Z1 tissue level implant, which features a unique combination of titanium screw and zirconia collar that facilitates 1-stage surgery with immediate aesthetic.
